Aman Pandey, Java Full Stack Developer

High-performing Team Player with 4.5+ years of Experience in SDLC, Agile, Software Development

+91 9667911138 · amanpandeyfeb2000@gmail.com· LinkedIn· Github· *Bangalore, India*

TECH SKILLS

Programming:	**Java**, JavaScript, Java 8, Java 17, Python
Web Technologies:	**RESTful APIs, HTML, CSS, JWT**
Cloud Technologies:	AWS (**Lambda, CloudWatch, EC2, S3 Bucket, API Gateway, RDS**)
Database Management:	**MySQL**, *PLX Script, DynamoDB, PostgreSQL*
Version Control:	Git, GitLab
Frameworks:	**React JS, Spring (Spring Batch, Spring MVC, Spring Cloud, JPA, JDBC, Spring Security), Redux**
Operating Systems:	Windows, Linux, macOS
Development Tools:	Visual Studio Code, **Tomcat**, Spring Tool Suite, **Maven**, Docker, Postman, Swagger
Other Tools:	**CI/CD**, Webpack, Apache HTTP Server, **Jenkins, JIRA, KUBERNATES, System Design**, **Agile**

WORK EXPERIENCE

John Deere India Pvt Limited, Bangalore, India ***Senior Software Engineer***

- **Full Stack Developer | Inventory Verification | (Feb 2025 – Present)**

  - **Architected and deployed scalable microservices using Java Spring Boot, achieving 99.9% uptime** ensuring **seamless functionality** and **scalability**. **Develop and maintained three different web and mobile Applications.**
  - **Engineered secure authentication** mechanisms using **OAuth 2.0 and integrated Okta to multifactor authentication ,** reducing unauthorized access attempts by 30% and streamlining **API Gateway. Used AWS lambda to integrate auto comment insertion technique.**
  - Delivered reusable **React components** (navigation, dashboards) using **Material-UI and Redux, improving development speed by 20%, attention to Detail and Quality Assurance** ensuring **responsiveness across all devices.**
  - Designed and implemented user-friendly form fields using **React Hooks.**

Advanced Skills: **Spring Boot**, **Java 8/17**, **AWS**, Dynamo DB , **PostgreSQL**, **React**, **Redux**, **MySQL**, **Jenkins**, **Docker**, **Kubernetes**, **Maven**, **Git**, **Jira**, **Hibernate**, **Microservices**, **JUnit**, **Mockito**, **Swagger**, **RESTful APIs**, **Liquibase**, Agile Environments, Playwright

Cognizant Technology Services India Limited, Bangalore, India ***(Software Engineer / Associate)***

- **Backend Developer | Google Play Services | (Sep 2021 – Feb 2025)**

  - **Collaborated with** managers and UX/UI designers to enhance advanced search and view tools, "Quokka" and "Mentor," optimizing Play Store application searches by reducing latency by 25%, improving data retrieval efficiency, enhancing user satisfaction, and time management through robust **backend algorithms.**
  - Backend **Development & Security: Java code reviews** for Android applications, Reduced API response times by 25% through efficient database indexing and query optimization using **Java 8**, Java 17 and related technologies. Managed a process re-engineering project to improve and consolidate end-to-end service processes.

Advanced Skills: Android Studio, **Java 8, Spring Boot,** PLX Script, Postman, **STS, AWS, PostgreSQL, Jenkins, Jira**

EDUCATION

Visvesvaraya Technological University, *Bengaluru, Karnataka, India (2021)*

Degree: Bachelor of Engineering (B.E.) in Computer Science & Engineering (7.28 CGPA)
